

Amendments to the Specification

Please replace the paragraph on page 28 (Abstract) with the following amended paragraph:

~~A vent assembly (50) for an electronic control module (28) is provided. The vent assembly (50) may be adheringly coupled to a printed circuit board (38). The vent assembly (50) being adapted to prevent the ingress of moisture and permit the egress of certain gases. An electronic control module comprising a vent assembly is provided. The electronic control module comprises a housing having a first aperture and a substrate disposed within the housing. The substrate has a second aperture positioned adjacent to the first aperture, and includes the hydrophobic vent assembly disposed over the second aperture and adheringly coupled to the substrate. The hydrophobic vent assembly may be adapted to prevent the ingress of moisture and permit the egress of certain gases.~~
